Summary

AI-focused Product Intern with experience across onboarding systems, monetization workflows, AI evaluation, QA, and cross-functional product execution in early-stage startup environments. Skilled in PLG onboarding, UX optimization, PRDs, experimentation thinking, and product strategy.

Education

Guru Gobind Singh Indraprastha University, New Delhi

B.Tech in Computer Science Engineering

2024 – 2028

CGPA: **8.56**

Skills

Product: Product Strategy, PRDs, User Flows, PLG, Activation, UX Audits, QA Testing, Monetization, Billing Logic, Sprint Planning, Agile

AI & Data: AI Prompt Testing, Hallucination Detection, Workflow Evaluation, SQL, Excel, A/B Testing, KPIs

Tools & Tech: Figma, Notion, Asana, Plane, GitHub, Java, Python, JavaScript, HTML/CSS

Experience

Associate Product Intern, Growhut

Jan 2026 – Present

- Designed and shipped a **15+ screen PLG onboarding system** with guided activation, role-based journeys, feature discovery, and onboarding workflows across multiple user states
- Defined monetization and billing architecture for a **3-tier SaaS model**, collaborating cross-functionally with product, design, and engineering teams on upgrade flows, feature gating, and AI usage-based pricing
- Conducted end-to-end QA and AI workflow evaluation, identifying **50+ bugs, UX issues, hallucinations, and edge-case failures**; owned PRDs, sprint inputs, release testing, and workflow documentation

Associate Product Intern, Zeepty

Mar 2025 – Jun 2025

- Audited **30+ storefront and checkout journeys**, identifying UX blockers and conversion-impacting usability gaps
- Authored **8+ PRDs** with workflows, telemetry planning, release criteria, and experimentation hypotheses for A/B testing initiatives
- Conducted competitor analysis and GTM research to support product positioning, launch planning, and customer experience optimization

Projects

Swiggy Campus Food Delivery Optimization

[Link](#)

- Designed a campus-focused group-ordering and batching model inspired by India's dabbawala logistics system
- Built pricing, incentive, and restaurant clustering logic to reduce delivery costs and improve affordability for students
- Created workflow prototypes covering ordering, batching, routing, and food quality validation systems

GPAI Strategy Analysis - IIT Delhi × GPAI

[Link](#)

- Conducted structured analysis on AI adoption gaps in STEM education using behavioral research and AI tooling evaluation
- Identified usability limitations, workflow inefficiencies, and adoption barriers in existing AI learning systems
- Proposed AI product and ecosystem recommendations; achieved **Top 2%** ranking for analytical depth and strategy quality

Leadership & Achievements

- Master's Union Campus Quest - Runner-Up**; led GTM strategy and campaign execution in a 3-member team
- Master's Union × SuperYou** - Achieved **Top 12 among 2000+ participants** for consumer growth strategy
- Aldeate (IIT Delhi × GPAI)** - Secured **Top 2%** position for AI product strategy and ecosystem analysis
- Millennium Fellowship (UNAI & MCN)** - Advanced to **Round 2 (Top 7% globally)**
- Smart India Hackathon** - Selected in **Top 50**; built AI-powered scam detection prototype
- Vihaan 8.0** - Finalist for building AI-based scam detection chatbot
- Codess.Cafe Mentee** - Selected among **2000+ applicants**
- Code in the Dark** - Secured **2nd position among 150+ participants**
